

## Quick Trip Report and Change in Schedule for Tuesday

Greetings, from Pasadena, California! Your students were remarkable. We put in a lot of time and energy exploring how Mount Wilson Observatory's 60-inch and 100-inch telescopes; three solar telescopes and dedicated astronomers revolutionized our understanding of the Universe in the 20th century. At the Huntington we saw one of the first Gutenberg Bibles; explored the Botanical Gardens, library and art galleries. Most importantly they bounced with needed changes of plans, were kind with each other, laughed, had powerful conversations and explored the information with great energy, clearly enjoying the time with each other

### **Tuesday Classes**

Because of the amount of physical exertion that this trip demanded, we have decided to make Tuesday November 17th. an optional day. Regular classes will resume on Wednesday, November 18th. If you want your student to attend school on Tuesday, please contact us today, Monday, and we will make arrangements to support your child at school.
